PORTABLE SPEAKERS
with NFC and Bluetooth® Wireless Technology

MODEL: MMA3630

OWNER'S MANUAL

IMPORTANT SAFETY INSTRUCTIONS

1. Make sure your external Bluetooth device is equipped with NFC and the function is set to ON.

BT PAIRING THROUGH NFC (Near Field Communication):

1. Connect the Micro USB Plug from the supplied USB connection Cable to the Micro USB Port on the rear of unit.

2. Wait a few seconds until the unit is automatically paired to the external BT Device. (The Blue Indicator will stop blinking).

3. During playback:
   - Press and release the or Buttons on the unit repeatedly to skip tracks.
   - Press and hold the or Buttons on the unit to adjust volume level as desired.

4. After paired, pull away the BT Device from the unit then begin playing music or answering calls as usual.

5. If pairing is complete you may now play music and answer calls with your external BT device.

6. In BT mode, connect the 3.5mm stereo plug from the supplied Audio Connection Cable to the AUX In/Line In Jack on the external Audio Player.

7. Connect the other end to the Line out Jack on the rear of unit as illustrated follows. The unit will automatically switch to Line out mode and sound from speakers will be automatically cut.

8. Normal operation after pairing:
   - If while pairing you are asked for a code please try “0000” or “1234”.
   - If the power of the battery is less than 10%, the Red Indicator will illuminate and blink. Then recharge the unit immediately.
   - The color of the Indicator will turn to Green.
   - The Blue Indicator on the front of unit will illuminate and blink.
   - If your external BT Device does not have a NFC (Near Field Communication) function, pair it to the unit manually before first time use (or re-pairing to a new BT Device) following the instructions below:

   1. Wake up your external BT Device then place it on the NFC Sensor of the unit.

   2. The Blue Indicator on the front of unit will illuminate and blink.

   3. After pairing is complete you may now play music and answer calls with your external BT Device.

   4. If pairing is complete you may now play music and answer calls with your external BT device.

   5. If pairing is complete you may now play music and answer calls with your external BT device.

   6. Proceed to the external Audio Player.

   7. Reduce the volume level of the connected/paired device then speak to the built-in microphone to answer the call. When your call is complete, press the Button to disconnect or end the call.

   8. Proceed to the external Audio Player.

9. When no longer in use, slide the Power ON/OFF Switch to OFF position to shut off the unit.

10. SPECIFICATIONS AND ACCESSORIES ARE SUBJECT TO CHANGE WITHOUT NOTICE.
