1. Install the Main Unit into the Plastic Stand as the illustrated below:

Installation & Connection:

- Place the antenna away from the metal surface to avoid interference.
- Choose a location near a window which gives the antenna a clear view of the transmitter.
- Ensure the antenna faces the location of the transmitter.
- Determine the signal strength.

Notes:

- For best results, ensure the antenna faces the location of the transmitter.
- It is important for the antenna to have an unobstructed path to the transmitter.
- Before Installation, determine the best location for optimum reception.
- It is recommended to test the antenna in different directions until the reception is achieved.

FCC WARNING:

- For UHF:
  - Increase the separation between the equipment and receiver.
  - Reorient or relocate the receiving antenna.
- For VHF:
  - Increase the separation between the equipment and receiver.
  - Reorient or relocate the TV and/or receiver.

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK) NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

ATTENTION:

- The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.
- The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

FCC NOTICE:

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.

For VHF:

- Connect the main cable directly to the antenna input on the receiver.
- Connect the coaxial cable to the antenna input on the receiver.

For UHF:

- Connect the coaxial cable to the antenna input on the receiver.
- Connect the coaxial cable to the antenna input on the receiver.

Note:

- For energy saving, if you will not watching the Television for an extended period of time. Unplug the AC/DC Adapter from the wall outlet.

SAT/VCR

- The Detachable Amplifier and the Main Unit will illuminate.
- Connect the coaxial cable to the audio input on the receiver.
- Connect the coaxial cable to the audio input on the receiver.
- Connect the coaxial cable to the audio input on the receiver.

Note:

- For Analogue (NTSC) and Digital (ATSC) broadcasts?
- Yes, this antenna is designed to receive Analogue (NTSC); Digital (ATSC) and HDTV broadcasts in the UHF & VHF bandwidths.
- Can this antenna receive digital or work with Analogue (NTSC) and Digital (ATSC) broadcasts?
- Yes, this antenna is designed to receive Analogue (NTSC); Digital (ATSC) and HDTV broadcasts in the UHF & VHF bandwidths.

PACKAGE INCLUDES:

- Main Unit
- Plastic Stand
- User’s Manual
- AC/DC Adaptor
- Detachable Amplifier

POWER SOURCE OF DETACHABLE AMPLIFIER:

- AC 110-120V~, 60Hz; 25mA
- DC 12V, 50 mA, (Center Positive)

GENERAL SPECIFICATIONS:

- Frequency Coverage: VHF: 40 – 230 MHz
- UHF: 470 – 860 MHz
- Impedance of antenna: 75 Ω
- Type of antenna: F type
- Power source of Detachable Amplifier: 5VDC (Center Positive)

SPECIFICATIONS AND ACCESSORIES ARE SUBJECT TO CHANGE WITHOUT NOTICE.
